

ST-25

Convenience
Clear interface

Conformity
Flexible and versatile

Frictionless
Small actions, big results

CONVENIENCE AS A STANDARD

The ST-25 was designed with the end-user in mind and offers all trusted Astrow features in a contemporary interface. Increase your employees' engagement by giving them access to their personal data, time card, bookings and absence requests directly on the terminal.

From now on, also your visitors can register themselves in just a few easy steps.

Since existing means of identification remain supported, there's no need to re-register your current badges and / or fingerprints!

WHEN COMPLIANCE AND SECURITY MEET

Switch to the ST-25 now and enjoy the highest possible degree of data security.

The ST-25 uses a https-encrypted connection for transferring data to the server. Also the physical, on-site security got improved considerably as your visitors will be incorporated in the PIP evacuation list after registering themselves. To help you comply with GDPR, the terminal allows you to inform the visitor about the way his data will be used, stored and deleted.

MINIMAL EFFORTS, MAXIMAL RESULTS

Extend the terminal with additional new features without giving up on user friendliness.

Each module has its own menu with easy controls, allowing you to make things run smoothly and without any complexities.

FEATURES

Amano has a rich history of developing terminals for over 25 years. This elaborate experience doesn't go unnoticed in the ST-25:

- **Time Card interface:** relate easily to traditional (paper) time cards while sharing information with employees.
- **Secured bookings:** Thanks to different back-ups, no single booking will be lost. All data transfer to the server is encrypted.
- **Repeat punch Check:** The terminal immediately checks for double bookings and blocks them, keeping your software clean and tidy, and reducing manual operations.
